COURSEWORK

UNDERGRADUATE

Computer Networks Object

Oriented Programming

Operating Systems AI and ML

Database Management

Systems

SKILLS

PROGRAMMING LANGUAGES

• Java • Python • Javascript

WEB DEVELOPMENT

•HTML •CSS •Javascript

DATABASES

•MySQL

OTHERS

•Data Structures and Algorithms
•Problem Solving • Logical Thinking
•Communication Skills

EXPERIENCE

FUTURENSE TECHNOLOGIES

Intern

Nov2023 – Mar2024

- Integrated NLP with Frontend , improving user interactions.
- Can Manage the Both (IAAS | PAAS) in Computing services in Google Cloud Platform
- Managing the Devops pipeline in jenkins and containerized applications from Docker
- Worked on new GCP architecture, ensuring scalability and cost-effectiveness.

PROJECTS

Copstone Project

| Google cloud ,Python

- Company Overview Trendy Fabrics is a leading textile manufacturer
- specializing in the production of premium textiles. With a substantial fleet of
- over 1000 industrial machines and a dedicated workforce exceeding 2000
- employees, the company has positioned itself as a pivotal entity within the textile
- industry

Requirements:

Real-time Ingestion:

Develop a platform to generate data every 40 seconds from 10 machines.

Host a document database to onboard real-time data from these machines.

Extract, Transform, and Load (ETL):

Select an ETL tool to transform the data and push it into a data warehouse.

Implement a staging area to onboard raw data for future processing Etc

PROJECTS

Final Year Project

Python | Rajberry pi | RFID

Problem: In supermarkets may customers waiting in Queue for Billing so We Did **IOT BASED SMART TRALLEY WITH BILLING SYSTEM.**

- I Online Marriage Registration System in 5th sem ,The Online Marriage Registration System, a robust PHP-based project .
- I In 6th Sem Related to Mobile application small Video Player with java in And
